Project

Cold Storage Website: Built a full-stack web application for managing cold storage inventory, clients, and billing using HTML, CSS, JavaScript, and SQL

- Designing and created front-end pages for product and client management.
- created SQL databased for backend to store and retrieve inventory and billing data.
- Focusing on data accuracy and reducing manual record-keeping errors.

PayPilot (Payment Intelligence & Failure Recovery System):

JAVA, Spring Boot, MySql, RestAPI, HTML, CSS, JavaScript, Maven

PayPilot is designed to monitor payment transactions and help identify and recover failed payments. It analyzes transaction failures, calculates failure rates, identifies failure reasons, and provides recommendations for retrying or recovering failed payments.
